High Speed Cables

Amphenol High Speed Cables is a leading manufacturer of bulk copper cable for enterprise data, storage, and networking applications. Drawing on the rich history of innovation of ***Amphenol Spectra-Strip*** cable engineering and the ***SKEWCLEAR®*** parallel pair product family, our integrated design, simulation, manufacture, and test expertise enables technology leading cable solutions across Amphenol ICC.

Our dedicated research & development team is aligned with ***IO, Cabled Backplane***, and ***Internal/Controller*** experts to deliver unmatched 'end-to-end' system design for performance, reliability, and cost-efficiency. Our equipment design & fabrication team enables manufacturing responsiveness to support the diverse portfolio of Amphenol ICC cable-enabled interconnects and customizable solutions.

Our mission is to deliver the best cable-enabled products, and we are actively driving cable technology forward to meet the challenges of current and next-generation customer interconnect needs. Please explore some of our newest innovative solutions:

- OverPass™ near-ASIC
- 112G Cabled Backplane
- Gen Z System architecture
- 400G IO
